

Kevin Li

(236) 518-7903 | kevin.shangkun.li@gmail.com | github.com/kevinli808 | Vancouver, BC

Education

The University of British Columbia - Vancouver

September 2025 – Present

Bachelor of Applied Science (Engineering) - Computer Engineering

Grade: 82.9

- Christopher Spencer Memorial Scholarship in Engineering

Personal Projects

5x5x5 LED Cube | C++, Arduino, Sensors

Ongoing

- Inspired by other LED Cubes found on YouTube.
- Programmed in C++ and uses an Arduino, accelerometer, gyro, magnetometer and other parts.
- Currently coding full positional awareness and a basic platform game that utilizes the 3D environment.

Desk Tamagotchi | C++, Arduino, Sensors

December 2024

- Uses a 8x8 dot matrix and temperature/humidity sensor to create a Tamagotchi-style toy
- Four states: Firework (displays randomized firework launches), gravity (all dots have gravity), car (car drives across screen), and Tamagotchi
- <https://github.com/kevinli808/Desk-Tamagotchi>

Auto-Score: The Future of Scorekeeping | C++, Python, OpenCV

Revised: June 2023

- Semi-automatic scoreboard for scorekeeping at lower levels of volleyball.
- Made with ESP32-CAM, Arduino, and other commonly found parts and programmed in C++ and Python.
- Uses OpenCV (Computer Vision) to recognize and respond to in-game volleyball events.
- <https://github.com/kevinli808/automaticScoreboard>

Volunteer & Work Experience

UBC Electrical and Computer Engineering - Dependable Systems Lab

May 2026 - Present

Research Intern

Vancouver, BC

- Integrate cybersecurity applications (Paper not yet published).

UBC Sustaingineering

September 2025 – Present

Software Developer - Software and Electrical Team

Vancouver, BC

- Work within a team to incorporate sensors into the Sustainable Mobile Research Testbed (SMRT) Project.
- Program a remote monitoring system (RMS) within the SMRT Project to collect various data.

UBC-V Senate

April 2026 – Present

Applied Science Student Senator

Vancouver, BC

- Represent 7000+ Undergraduate Students on the UBC Senate, the highest academic body that creates and manages policy for the university.
- Communicate with the Engineering Undergraduate Society (EUS), Nursing Undergraduate Society (NUS), Planning Students' Association (PSA) to connect student leaders with faculty.

UBC Engineering Undergraduate Society (EUS)

October 2025 – April 2026

Vice-President - First Year Council

Vancouver, BC

- Plan EWeek and other special projects/events for over 1200 First Year Engineering Undergraduates.
- Represent First Year Engineering Undergraduates on the EWeek Committee.
- Communicate and collaborate with other undergraduate societies to coordinate joint events

Department of National Defence - Vernon Cadet Training Centre

Summer 2024

Professional Development Staff Cadet (Seasonal Full-Time)

Vernon, BC

- Work within a team of five Staff Cadets to create recommendations based on observations of how other Staff Cadets interact, teach and behave around Course Cadets.
- Provide instructional support and guidance to Staff Cadets to help improve the overall quality of teaching.
